Diamond Graphics Achieves SOC 2 Type 1 Certification

Diamond Graphics Demonstrates Commitment to Data Security and Compliance.

FOR IMMEDIATE RELEASE: April, 2024

Ramsey, MN – Diamond Graphics, the go-to expert in Total Solution Card Manufacturing, proudly announces its successful achievement of SOC 2 Type 1 certification. This milestone underlines Diamond Graphics' dedication to upholding the highest standards of data security, integrity, and compliance within the industry.

The SOC 2 Type 1 certification, issued by EisnerAmper, validates that Diamond Graphics has established and implemented controls and processes to safeguard customer data. Undergoing evaluation by independent auditors, Diamond Graphics has demonstrated the effectiveness of its internal controls in meeting the Trust Services Criteria for security, availability, processing integrity, confidentiality, and privacy.

"We are thrilled to attain SOC 2 Type 1 certification, which reflects our ongoing commitment to prioritize the security and privacy of our clients' data," said Rob Harris, CEO of Diamond Graphics. "This achievement reaffirms our dedication to maintaining the highest standards of excellence and trustworthiness in our operations. Our clients can have confidence that their sensitive information is handled with extreme care and protection."

The SOC 2 Type 1 certification provides assurance to Diamond Graphics' clients and partners that the company has implemented comprehensive controls to alleviate risks associated with data security and privacy. By adhering to industry-leading practices and standards, Diamond Graphics demonstrates its readiness to meet the evolving needs and expectations of its clients and stakeholders in an increasingly complex digital world.

Diamond Graphics remains committed to continuous improvement and will pursue SOC 2 Type 2 certification to further validate the effectiveness and operational sustainability of its controls over time.

About SOC 2 Type 1: SOC 2 Type 1 compliance is a critical standard for organizations that manage customer data, particularly in cloud computing and data hosting services. This audit framework, developed by the American Institute of Certified Public Accountants (AICPA), evaluates the design and implementation of security, availability, processing integrity, confidentiality, and privacy controls at a specific moment in time.
